Royce Larson
Park Valley Hereford Association
Park Valley, Utah 84329

Dear Royce,

It was nice to get together last week at our turquoise stone quarry and review fences, cattle access etc.. We discussed the impact of the pending property patent that Glen Fuller has filed and that really does not change anything at all relative to the association's access to Rock Canyon. Glen Fuller has always been cooperative on this issue and we intend to be the same.

We discussed leaving the Rock Canyon access gate unlocked during the cattle season for your convenience. I have no problem with this as long as everyone honors the no motor vehicles in the canyon request.

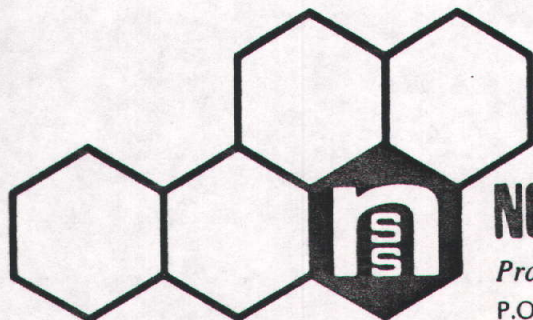

One fence that we did not discuss is one we wish to install across the canyon at the north end of our property so that we can control cattle along that short stretch of the stream corridor. There would of course be a gate at the north end for cattle to pass through.

After you discuss this with everyone let me know if you have any further questions.

Sincerely,

Gary Mullard
President
